

# **Steel City**® Spring Steel Fasteners

## Catalog Numbering System

### INDIVIDUAL PART NUMBERING SYSTEM

#### SSF - H A 1/4 T

1            2    3    4    5

1. Catalog numbers will be preceded by an "SSF" to signify it is a **S**pring **S**teel **F**astener part and to give it a unique catalog number. Non-Spring Steel Fastening items in this catalog are not preceded by SSF.
2. This portion of the catalog number is a one letter index based on the category the product falls in. For this example, "H" is used for the Hangers category. The following is a list of all the categories and their one letter index:
  - B — Beams and Purlin
  - H — Hangers
  - C — Conduit and Cable
  - S — Stud Wall and Drywall
  - T — Acoustical Tee
  - V — Low Voltage / Telecom
  - M — Miscellaneous
3. This portion of the catalog number references the style in a given category. For this example, "A" is used for the rod and wire hanger with thread impressions.
4. This portion of the catalog number is numeric and will be based on the size or range of sizes the part will fit. For example, the SSF-HA1/4T is a hanger that fits 1/4" threaded rod, so the numeric code would be 1/4.
5. A final letter may be but will not always be included after the numeric code. This final letter indicates one of the following:
  - S — the part has an attached stud
  - T — the part has a thread impression
  - A — adjustable

### RIVETED COMBINATIONS

#### SSF - B V1/4 - A3/8

1            2            3            4

1. As with the individual parts, riveted combinations will always be preceded by an "SSF" to signify it as a **S**pring **S**teel **F**astener part.
2. This portion of the catalog number, as with the individual part, is a one letter index based on the category of the product. For this example, "B" is used for the Beams and Purlin category. (See listing above.)
3. Riveted combinations of two parts will have a catalog number constructed from the two individual catalog numbers. This portion of the catalog number references the style and numeric size or range for the first piece of the combination (see #3 and #4 under the Individual Part Numbering System). Note that the first part in the combination will have the same category as the combination. In this example, V1/4 represents a vertical flange or C-purlin clip with an individual catalog number of SSF-BV1/4.
4. This portion of the catalog number references the style and numeric size or range for the second piece of the combination (see #3 and #4 under the Individual Part Numbering System). In this example, the A3/8 represents the rod hanger with an individual catalog number of SSF-HA3/8.
