Thomas & Betts Canada is a leading manufacturer of electrical components used in the Canadian construction, industrial, utility and communications markets. With a cross-Canada presence of over 1,600 employees working in a head office, five regional sales offices, a Master Distribution Center and eleven ISO 9001 : 2000 certified manufacturing facilities, no matter where you are in Canada, there's a Thomas & Betts facility nearby.

From the smallest wire connector to the largest utility pole, information and support for our complete product offering is never far from reach. Whether by phone or fax or through our web site and printed catalogues, Thomas & Betts product information, technical support and customer service is at your fingertips.

Consult the 2008 BlueBook to find specific Thomas & Betts contact information for your region, market and product category.
