Kindorf® Trapnut Strut Fastener™ Fewer parts add up to huge labour savings.

The unique scissor action of the Thomas & Betts **Kindorf® Trapnut™** Strut Fastener closes at any desired position on the threaded rod. Once closed, precision threads trap the threaded rod for a sturdy hold that can be adjusted up or down for fine-tuned positioning. While the versatile Trapnut™ has a locking pin that holds it in the desired position, it can also be removed and reused.
