

A Proven Industry Partner

When you specify Thomas & Betts electrical components, you're specifying quality, reliability and safety. We stake our name on it.

From the smallest wire connector to the largest cable tray system, every Thomas & Betts product is built to strict quality control and design standards – standards which meet or exceed those of the Canadian electrical industry.

What's more, over 80% of our products are Canadian made, in one of our twelve ISO-certified, manufacturing facilities located across the country.

T&B Cable Tray Systems, **STAR TECK**® teck cable fittings, **MICROLECTRIC**® meter sockets, **T&B** Emergency Lighting Systems, **HAZLUX**® hazardous location lighting and more – you'll find Thomas & Betts products installed in industrial, commercial, residential and institutional facilities throughout the country.

If our name is on it, you can count on it... and on us.

T&B Engineered, since 1898.
Make Thomas & Betts your industry partner today.

Contact our Manitoba-based technical sales team to find out how we can assist you in your next project.
