

LRC® Snap-N-Seal®
One-Piece BNC Compression Connectors

SECURITY is all about SECURE CONNECTIONS

The most sophisticated security systems are only as reliable as their cable connections. Keep your systems operating trouble-free with **LRC® Snap-N-Seal®** one-piece BNC compression connectors from Thomas & Betts.

Available in four options for a variety of cable applications, BNC Compression Connectors eliminate the cable damage and service calls often linked to traditional connectors.

A true 360° compression on to the cable ensures optimum RF shielding performance and an integral silver-plated contact delivers a reliable, high frequency return loss performance of -30dB to 1 GHz.

Find out more about high integrity connections for CCTV applications. Visit the Thomas & Betts booth at Security Canada Central or call 1-877-291-7771.
