

# STAR TECK®

As the demands placed on electrical connections have evolved, so have Thomas & Betts teck cable fittings.

Since 1953, Thomas & Betts engineers have incorporated feedback from end-users working in the harshest and most corrosive industrial environments. The result is StarTeck®, a family of high performance cable fittings that, year after year, remain the industry benchmark for reliable construction and ease of installation.

Needs change. The Thomas & Betts commitment to meet them doesn't.

To find out about the latest additions to the StarTeck® family, contact your local sales representative.
