When you choose Thomas and Betts components, you're choosing quality, reliability and safety. We stake our name on it.

Over 75% of our products are Canadian made, in one of our thirteen ISO-certified, manufacturing facilities located across the country.

Every Thomas & Betts product, regardless of origin, is built to strict quality control and design standards – standards which meet or exceed those of the Canadian electrical industry.

If our name is on it, you can count on it.
