

# Carlton®

## Bore-Gard® PVC Trenchless Raceway

Carlton® Bore-Gard® PVC raceway eliminates the costly problems of HDPE pipe on a reel such as reel transport and handling, fusion welding, uncoiling and wasted pipe, safety hazards and additional job site labour.

Designed to meet the rigorous requirements of horizontal directional boring for electrical and datacom applications, **Bore-Gard** raceway incorporates a water-tight seal and locking ring that enables fast, cement-free assembly, strong enough for 1000 foot bores.

**Lower installed cost,  
easy installation  
for directional  
boring applications**

- Short lengths of 10 and 20 feet fit into the tightest spaces
- Lower freight costs - easier handling on site
- No reel handling equipment required
- No fusion splicing – uses standard PVC fittings
- No distortion - greater internal fill capacity
- No wasted product
