One-Piece BNC Compression Connectors

NEW!

CONNECTORS FOR FT6-RATED CABLES

SECURITY
is all about
SECURE

CONNECTIONS

The most sophisticated security systems are only as reliable as their cable connections. Whether you use **FT4** or **FT6** rated cables, keep your systems operating trouble-free with **LRC® Snap-N-Seal®** one-piece BNC compression connectors.

Since 2004, **LRC® Snap-N-Seal®** Compression Connectors have been used extensively in CCTV applications using **FT4-rated cables**, eliminating the cable damage and service calls associated with traditional connectors. Now, the same high performance connections are available for applications using **FT6 cables**.

- Easy installation
- True 360° compression for optimum RF shielding performance
- Integral silver-plated contact for reliable electrical performance
- Precision coaxial contacts for high bandwidth applications
