

Working together

...for good results.

It takes a lot of energy to keep the Alberta oil sands moving and electricity plays a major role. That's where we come in.

Thomas & Betts brings electrical power in; and protects, directs and manages the flow of electricity inside industrial facilities with products such as T&B [Cable Tray Systems](#), [StarTeck® teck cable fittings](#), [Blackburn® mechanical and compression connectors](#), [Hazlux® classified area lighting](#), and [Ty-Rap® cable ties](#), to name just a few.

Whether in classified hazardous areas or administrative complexes, our products have a proven track record of consistently exceeding performance and safety expectations.

We're proud of our 30-year record as a supplier-partner to the oil sands and look forward to continuing this tradition in the future. Working together – we'll achieve good results.
