

You're in the business of innovation.

So are we.

From extraction to upgrading and all points in between, it takes a lot of products and resources to keep Alberta's oilsands facilities running safely and reliably. To remain competitive in the global market, it also takes continuous innovation.

At Thomas & Betts, our experience in meeting the electrical needs of Canadian industrial facilities for over eight decades has been the inspiration for many "**made in Canada, for Canada**" products. Over the years, input from engineer and installer customers has resulted in products that stand up to the harshest environments while simplifying installation and maintenance.

Looking for an innovative source for your electrical components? Talk to Thomas & Betts.
