

NEVER

has one tape done so much in so many places!

T&B Self-Fusing Insulation Tape

Underground, underwater, above ground, hot and cold environments, high and low voltage applications — wherever wire and cable terminations are found, T&B Self-Fusing Insulation Tape seals, protects, repairs and harnesses with amazing dielectric strength.

As the name suggests, no adhesives or heat are required to form an immediate and permanent bond, even in wet conditions. And, since this general-purpose tape is self-fusing, removal is quick and easy with no sticky residue left behind on electrical connections. Manufactured using modified silicone rubber compound, T&B Self-Fusing Insulation Tape is resistant to UV rays, ozone, radiation, arc track, steam/moisture, fresh/salt water and temperatures ranging from -90°C to 260°C.

Once you try it, you'll wonder what you ever did without it!

(P.S. Keep a roll at home! T&B Self-Fusing Insulation Tape is also great for all kinds of household repairs – pool filters, hoses, plumbing, car repairs, etc.)

Now available at your local participating electrical distributor.
