

## READY TO INSTALL!

Presenting the true one-piece clamp for EMT and rigid conduit in commercial and industrial applications

*Exclusively from Thomas & Betts*

# QUICK clamp II™

**"Universal" head integral bolt accepts most tools**

**Suitable for same trade size of EMT and rigid conduit**

**Angled bolt allows for easy installation or reconfiguration**

Still breaking apart and reassembling before you install? Give yourself a break with the new QuikClamp II™ pipe clamp. Packed with innovative design features to make every installation quick, durable and versatile, the QuikClamp II™ comes ready to install, right out of the box.

- **True one-piece construction** — arrives ready to install — no breaking apart — no separate pieces to lose
- **Attaches a complete range of EMT and rigid conduit (1/2 in. to 4 in.)** to strut channels
- **Embossed J-hooks** increase loading capabilities
- **T&B flex window** provides wrapping action around pipes
- **Easy reconfiguration without complete disassembly** — easily accessible angled bolt allows for field adjustments and closer conduit spacing
- **Electrogalvanized finish** — additional corrosion resistance
