

T&B new product
alert

Avoid unpleasant surprises with Ty-Rap® Detectable Cable Ties.

In the pharmaceutical, food and beverage industries, the last thing you want is the trimmed-off end of a cable tie packaged with your product.

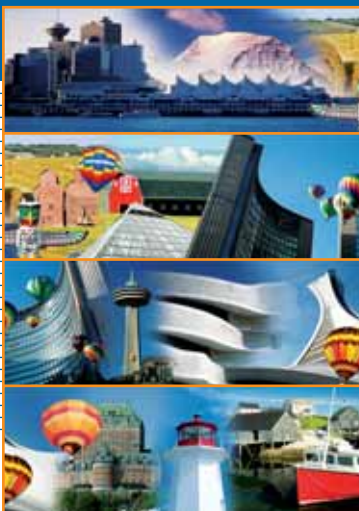

The new Ty-Rap® detectable cable tie is an efficient alternative to standard nylon cable ties and costly stainless steel fasteners. Incorporating a unique compound detectable by metal detectors and x-ray equipment, it is also available in a buoyant polypropylene version for use in liquid processing areas.

Ask for it at your local participating electrical distributor.
