

T&B new product alert

Marrette® Luminaire disconnect The first CSA-approved Luminaire disconnect

All new and existing fluorescent lighting fixtures over 150V must now be equipped with integrated electrical disconnects. The Marrette® Luminaire Disconnect is the device of choice to meet this new requirement.*

Featuring integral wire leads, a choice of 2- or 3-pole configurations, oversized electrical contacts, a finger-safe line side and a rounded compact design, the Marrette Luminaire Disconnect is designed to install quickly and disconnect easily to enable safe servicing of the fixture and ballast.

Available in bulk OEM packaging or convenient kits for electricians.

*CEC part I, rule 30-308(4), 2006 Edition, effective January 1, 2007
