

The energy-efficient construction solution

Iberville® BCR2000 low-profile device box and protector plate make respecting energy-efficient home construction standards easy.

The Iberville® BCR2000 device box is specifically designed to help contractors meet the requirements of energy-efficient home construction. This high-capacity box installs quickly, eliminating the need to cut into any type of vapour barrier during installation. This device box can help certified contractors obtain Novoclimat 2.0* certification for their buildings.

*Novoclimat 2.0 is a program of the "Ministère de l'Énergie et des Ressources naturelles du Québec".

Quick to install: at least 3 times faster than current methods

No need to cut and damage the vapour barrier

CSA certified for single center screw mounting

- 18 cubic-inch capacity; 50% more than traditional boxes
- Quick to install: at least 3 times faster than current methods
- No need to cut and damage the vapour barrier
- Connector included
- Exclusive protector plate prevents cable damage and meets CEC code requirements
- CSA certified for single center screw mounting
- Designed and manufactured in Canada

Thomas & Betts. Your best connection for innovative solutions.

1

→ Position the box on the stud.

2

→ Screw the box to the stud using the center hole.

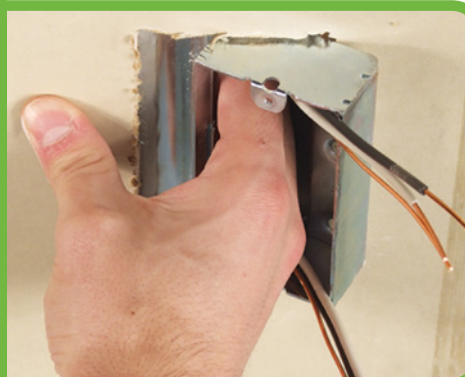

3

→ Insert the cable into the box.

- View with drywall installed.
- Will accept most GFCI outlets with a maximum depth of 1-1/8 in.

- The innovative design will allow you to easily extract the box without damaging the drywall.

Exclusive protector plate

Use when electrical cables are exposed on top of the vapour barrier and crossing over wood studs.

See our installation video at www.tnb.ca/video
