

IBERVILLE[®]

LHTQ[™] Device Box Family

The name you know.
The quality you trust.
The features you've come to expect.

The new standard in installation efficiency.

“Loomex”
ready clamp

Holes
for external nailing

Tabs
for positioning

Quick
mounting

Descendants of the original IBERVILLE® steel outlet box, the LHTQ™ device box family incorporates the same quality construction that Canadian electrical contractors have trusted and asked for by name since 1920. Yet, like every new generation, the LHTQ family is blazing new trails in design innovation and installation efficiency.

What does it take to be an LHTQ™?

Whatever model you select, the LHTQ™ designation is your assurance of increased cubic capacity and fast, accurate installations. In addition to CSA-approved one-screw mounting up to 2-gang*, all LHTQ models include these practical and time-saving features:

Flat box sides for maximum stability, internally embossed mounting slots for easy screw insertion.

Holding prongs provide temporary support, leaving hands free to complete installation.

Includes two ground screws. All screws feature oversized Robertson/Slot heads.

Positioning guides for outside wall and 1/2-inch drywall applications ensure installation at proper distance from stud edge.

Retractable tabs simplify box positioning for double 1/2-inch drywall installation.

Ears can be broken off when the boxes are used in rework applications.

It's a family affair.

*Per CEC 12-3010(3), boxes over 4-in. (100 mm) wide require additional support.

Presenting the complete family...

The IBERVILLE® LHTQ™ family includes four models ranging in capacity from 14.5 to 18 cubic inches, each one as easy to install as the last. Whatever the application, there's an LHTQ steel device box to meet your needs.

BC1304-LHTQ™

14.5 cubic-inch capacity instead of the 12.5 cubic inches standard for this category of device box.

BC2304-LHTQ™

Precision-welded for strength, 14.5 cubic-inch capacity instead of the 12.5 cubic inches standard for this category of device box.

BC3104-LHTQ™

16 cubic-inch capacity for any installation requiring a greater number of conductors such as heating and GFCI applications.

BC1018-LHTQ™

Biggest single-gang steel device box on the market. 18 cubic-inch capacity delivers extra space for heavier duty installations such as fan and lighting controls, GFCIs and thermostats.

... and the gang!

BC2304-LHTQ™-2

BC2304-LHTQ™-3

BC2304-LHTQ™-4

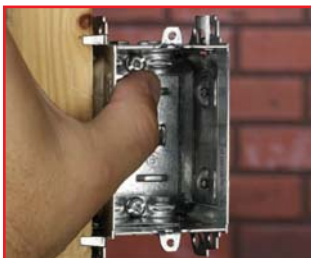

Save time and effort during multiple device, wall outlet installations with pre-ganged, precision-welded 2-, 3- and 4-gang BC2304-LHTQ™ models.

IBERVILLE® LHTQ™ – innovative design and quality manufacturing are a family affair.

So easy to install

1/2 in. Drywall

Position the box using 1/2-inch drywall guides and secure with screw(s) or nails.

Double Drywall

Retract the double drywall positioning tabs, use these to position the box and secure with screw(s) or nails.

Outside Wall - 2x4 + lath (forenze)

Position the box using guides for outside wall applications and secure with screw(s) or nails.

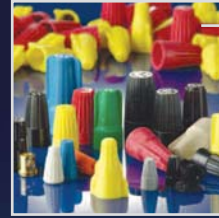

Other Thomas & Betts products for commercial and residential applications:

Iberville®
Cable connectors, cord and liquidtight connectors, staples, nailing straps and hardware

Red Dot®/Iberville®
FS Covers, drytight boxes, vapourtight boxes

Marrette®
Marrette® XTP®, Type II® Winged, Black™, ACS™ and Set Screw

Microelectric®
Meter sockets, mast kits and pole line hardware

Steel City®
Floor boxes, poke-through system and accessories; fasteners, hangers and clamps

Carlson®
Conduit, enclosures, door chimes and flexible raceway systems

IBERVILLE® steel device boxes have been designed and manufactured in St-Jean-sur-Richelieu (Iberville), Quebec since 1920. Backed by a dedicated Canadian-based engineering, marketing and customer service team, as well as extensive, cross-Canada sales coverage, the IBERVILLE®/Thomas & Betts brandname is your assurance of safe, secure and efficient device box installations every time.
