Iberville[®]

Thomas & Betts

A Member of the ABB Group

Iberville®

The name you know.
The quality you trust.
The features to make your job easier.

Today's Iberville® boxes incorporate the same quality construction that Canadian electricians have trusted and asked for by name since 1920.

An industry standard, Iberville® boxes have continued to evolve over the last century to meet changing construction requirements and to incorporate new, innovative features that save time and increase efficiency on the job site.

All Iberville® products are designed and manufactured in Canada to meet or surpass Canadian electrical industry standards.

IBERVILLE®

Octagonal boxes for ceiling fans CI54151-LF and CI54171-LF

Depth and capacity for fast, code-compliant installations

- Heavy-duty steel construction for maximum strength and durability
- Two models available:
 - **CI54151-LF**: 1-1/2 in. deep (15 cu. in. capacity)
 - **CI54171-LF**: 2-1/8 in. deep (21 cu. in. capacity)
- Maximum load capacity: 35 lb. (15.6 kg) fan at recommended torque of 35 in.-lb. (3.95 Nm)
- For use with nonmetallic sheathed cable
- Ceiling fan may be mounted horizontally or with up to 30° inclination
- CSA certified

IBERVILLE®
**Low-voltage
mounting accessories**

Time-saving solutions for Class 2 wiring

CICSB-1
**Mounting bracket with
integrated partition**

- Organizes and supports low-voltage cables
- For use with 2-1/2 inch deep gangable boxes
- Integrated steel partition: exclusive to IBERVILLE®
- Easy to install

CIMB-0
**Mounting
plate**

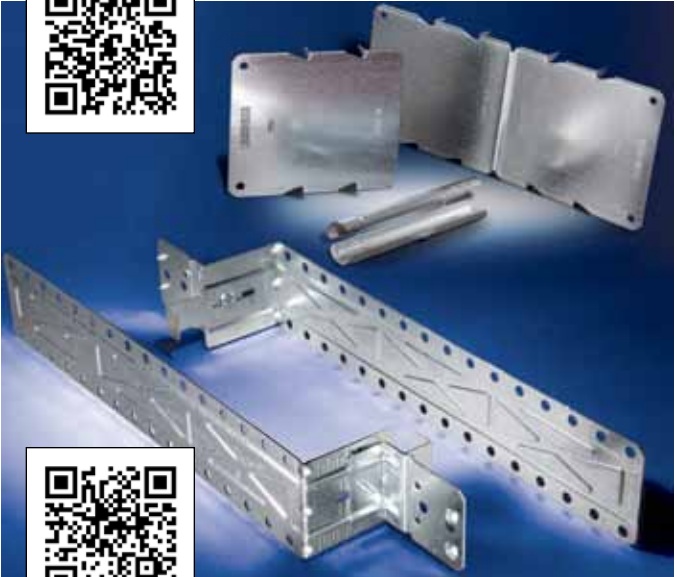

- Positioning tabs for precise vertical installation
- Use as a template to cut into drywall
- Installs on wood or steel studs

IBERVILLE®

Support bracket and protector plates

Innovative ways to meet code requirements

BCBK-01 Adjustable bracket

- Meets requirements of C.E.C., rule 12-3010
- Ideal solution to support boxes between studs
- Saves time – no need to build extra supports on site
- Adjusts to any drywall thickness and box combination
- CSA certified

CI66 series Protector plates

- Meet requirements of C.E.C., rule 12-516
- Prevent damage to cables caused by nails and screws
- No interference with drywall installation
- Wide range of easy-to-install solutions
- CSA certified

IBERVILLE®
Rework boxes

Solutions to take the work out of rework

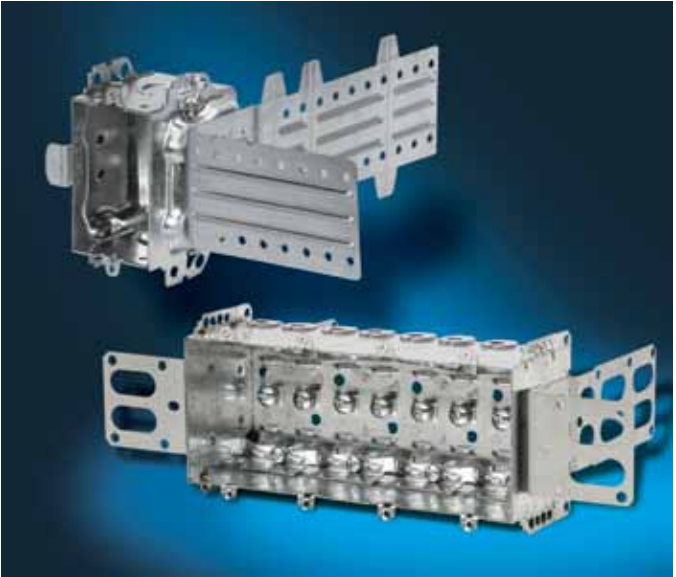

BC54171-LD
High-capacity
octagonal box

- Additional capacity for LED lighting retrofits in existing walls or ceilings
- 21 cu. in. capacity, 2-1/8 inches deep
- For use with nonmetallic sheathed cable or armoured cable
- CSA certified

BC1102-LRB
Low-profile
device box

- Ideal for shallow installations where space is limited
- Single-gang, gangable device box
- 10 cu. in. capacity, 2 inches deep
- For use with nonmetallic sheathed cable or armoured cable
- CSA certified

IBERVILLE®
Steel stud boxes

SSX-NG series
New generation,
heavy-duty boxes

- Heavy-duty, adjustable brackets deliver solid support up to 3-1/2 in. away from stud
- Brackets adjust to studs from 2-1/2 to 6 inches
- Install boxes on either side of steel studs
- For use with nonmetallic sheathed cable or armoured cable
- Five models available – two device boxes, two square boxes and one octagonal box
- CSA certified

CI2104 series
Device boxes

- Pre-ganged, precision welded
- Time-saving features for quick installation
- Now available in 4-gang model
- Single-, 2- and 3-gang models also available
- For use with nonmetallic sheathed or armoured cable
- CSA certified

IBERVILLE®
Boxes for ICF
construction

Install in any location after the concrete pour,
even next to supports

- Strong, durable steel construction
- Fast, easy installation using standard electrical wiring
- Device boxes up to 4 gang, for use with nonmetallic sheathed cable or armoured cable
- Device boxes with conduit knockouts
- Square and octagonal boxes
- CSA certified

Still the standard in installation efficiency

Whatever device box model you select, the LHTQ® designation is your assurance of increased cubic capacity and fast, accurate installations. In addition to CSA-approved one-screw mounting up to 2 gang, all LHTQ® models include these practical and time-saving features:

- **Flat box sides for maximum stability**
- **Holding prongs providing temporary support, leaving hands free to complete installation**
- **Includes two ground screws per gang**
- **Positioning guides for outside wall and 1/2-inch drywall applications**
- **Retractable tabs simplify box positioning for double 1/2-inch drywall installation**
- **CSA certified for single center screw mounting (on single- and double-gang boxes)**
- **Pre-ganged, precision-welded 2-, 3- and 4-gang BC2304-LHTQ models save time and effort**
